**12. Essey:**

In every family, parents want their children to achieve the highest levels of educational attainment, and as is the case in my family and because I am the eldest girl in this family, my parents 'hopes were attached to me to obtain degrees that would allow me to study human medicine, because it holds the highest degrees in my country, Syria. But I did not get the desired grade, and my degrees allowed me to study engineering only in all its branches. I was accepted into the electrical energy engineering department in 2012, I entered the university as if I was heading towards the unknown. At first, I had no desire to study electrical engineering, and I spent the whole first year feeling sad that did not achieve my father's desire. At the end of my first year, I met a colleague Lee is in engineering and we studied together and followed all the lectures. I started to love my specialist, and year after year I became a fan of electrical engineering, and our grades improved together and my yearly rate increased until I got an average of 85.25 percent in the last year. A cumulative rate of 79.89 percent over the five years. After graduation, my colleague obtained the highest grades, and he was honored for being the first graduate, and I was also the second graduate. After that, we never stopped satisfying our passion and pursuing our education in electrical engineering. After that, I finished my master's degree in 2020 in the field of renewable energy engineering, with a cumulative rate of 90.8 percent. While my colleague was sent by the university to India to study a doctorate through masters. It was a coincidence that I met him so that my heart filled with hope. I loved it over the past 9 years, we lived a lot together, graduated, got the highest grades, and we are still pursuing the dream of obtaining a doctorate degree in the best educational institutions. He has been engaged to me since 2019, and I am waiting with great longing for him to finish his master's studies, and come back to me to hold our wedding, and we will travel together to complete our education. Finally, we must never give up, work hard, and sincerely adore ourselves. With love and work, the greatest difficulties can be overcome.
