

BUILD CHANGE

प्रकोप प्रतिरोधि भवन निर्माण
निर्माण पद्धतिको सुदृढीकरण

02 October, 2020

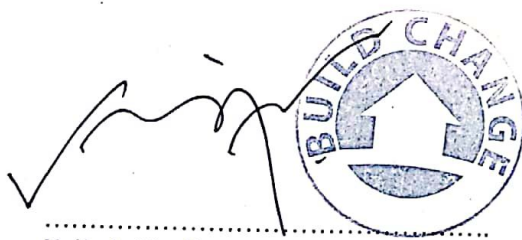

Experience Letter

This is to certify that **Mr. DEVESH PANDEY**, permanent resident of Pokharvindi 01, Rupandehi, Nepal has worked with Build Change - Nepal as **Civil Engineer – Field Monitoring & Site Supervision** from **02 September 2019** until **30 June 2020**.

His key responsibilities as Civil Engineer – Field Monitoring & Site Supervision are listed below:

- Conduct field monitoring of owner-driven housing reconstruction using mobile construction monitoring checklists and collect corroborative information through each phase of house construction.
- Consult and suggest homeowners for the appropriate building design, develop design and support homeowners to process as per local government's guideline.
- Liaising and coordinating with local government and other stakeholders on technical issues.
- Provide engineering advice on safe construction to homeowners, builders and partner organizations' staffs.
- Assist in trainings for engineers, architects, drafters and other technical staff including development of training materials and presentations.
- Assist in solving problems and generating solutions in the field for special cases.
- Assist in controlling quality of information for the project activities during its implementation in Nepal.
- Communicate and report to the management about the progress/issues of projects implemented by Build Change. Prepare field reports and assist in other reporting as requested. Help compile weekly construction monitoring reports.

During his work tenure, we found him to be sincere and extremely hard working. He is dependable and motivated. He is committed to his work and takes extra initiative to solve an issue or to deliver project activities on time.
