

To whom it may concern

Dear Sir/Madam,

With this letter, I'm applying for a position in the master of Indian Council For Cultural Relations Scholarship Program 2021/2022 offered at (IIT Kharagpur), hoping to be accepted by one of the most prestigious institutions and universities in the world.

Since my childhood, I was keen to attend all the activities that took place in the school and got first place in middle school since 2006. I got admitted to the University of Technology / College of Engineering / Building and Construction Engineering Department and specialized in Highways & Bridges Engineering Branch; I appreciated each minute to exploit each opportunity accessible to discover some new information during the four-year study. Through the four years, I learned how to study, to be honest, how to handle classes daily, and even how to focus on the important information in the class. I did not lose hope and did not leave my studies the harsh conditions led me to complete my study to become an independent woman able to leave a mark in her country. As a result of my ambition got a good grade (72.31%) with a rank of graduation was (7) out of (30).

I have decided to apply for this grant, as it will bring me one step closer to my goal of becoming a researcher and also develop myself in this field. I would gain the opportunity to learn from recognized professors, develop new perspectives of view, and further strengthen my abilities for critical thinking. I'm excited and looking forward to earning my post-graduate degree from an international education institute. Studying abroad is a very rare chance that I intend to exploit as much as I can to get the degree, and bring back to my country what I have learned and experienced and share that information I got with my colleagues in work.

Indian Institute of Technology Kharagpur is the most important and strongest well-known Institute in the State, where it is an ancient academic institution that offers the best opportunities for first-class learning and research, and postgraduate studies. Also, I am a very ambitious girl and I have a great passion for knowledge and discovering everything new so IIT Kharagpur Institute supports ambitious students throughout the study period.

That's why I want to commit myself and my abilities to fulfill my life goals and become a woman who would please my nation, society, and family and to increase my society's chances of developing by being of great potential among it.

Finally, the prospect of participating in this program is an excellent way to observe varying information systems, as well as, build upon my cultural cognizance.

I am confident that my academic records, experience, professional goals, and enthusiasm qualify me for consideration.

Thank you very much for your time and consideration, I look forward to hearing from you.

Sincerely,

MARYAM ABDULRAHMAN
