LITTLE ABOUT ME

I am an engineer with business interest. I have development and management skills in various web-development services with over 5+ years of experience. I currently run a small web designing and development company, and personally manage all the web related projects. I have been working on finding customer and delivering product as per their need, i have gathered a good experience in Nepali market. I aim to explore and bring out coolest things from the new techs available, not by developing but by understanding the future outcome and making colleague work on them. I like performing leadership.
