12. Essey:

The challenge in Afghanistan The challenges that everyone faces in Afghanistan during their academic studies are the situation of the country in different aspects like security, jobs, working situation and poor economic situation. Personally, during high school due to economic constraints, my family was not able to provide my school needs and I had to work part time to get what I need for my school, that had really affected my academics although I was trying my best but I was not able to catch up to my classmates and I had to study long night sessions. As a result of my hard works and endeavour I was able to get into Kabul University which is one of the top universities in Kabul Afghanistan to do Civil Engineering, and based on my KANKOR examinations marks I got government scholarship to do my bachelor's degree in BTech Electrical and Electronics Engineering at National Institute of Technology Warangal (NITW). I have successfully completed my bachelor's degree in Electrical and Electronics Engineering at NITW with 7.35 CGPA and returned to my home country Afghanistan. After returning to Afghanistan, I have done a six months internship at YES-II (Youth Entrepreneurship Support -II) a program implemented by GIZ a German NGO for supporting and encouraging young minds in the field of renewable energies such as Photovoltaic systems, Solar powered irrigation system, Solar Hot Water systems and entrepreneurship and leadership. Based on international surveys Afghanistan is one the most corrupt countries and finding a job that would be suitable with your background is a big challenge. Another challenge in Afghanistan that is very clearly visible is the security and the current situation in Afghanistan, almost every day there is bad news about Afghanistan about any suicide attack or any kind of bombing that is happening in the country, in every terrorist attack civilian innocent people are getting killed that most of them are educated people who wanted to do something for Afghanistan. Security is the reason that most of the people are getting out of the country. Based on report during 2018 to 2020 thousands of people immigrated to European countries that most of them were from Afghanistan. These are all the challenges that people of Afghanistan faces every day, but they are strong and hope to bring peace to the country, and become one the developed countries in the world, that is possible if and only if people of Afghanistan work together study and build their infrastructure and that is not possible without the help and knowledge of the young generation. Anyone who lives in Afghanistan hopes for a peaceful life and wishes to develop their country. I personally want to study and get knowledge to be able to contribute in the process of building and developing the country, and remove these challenges for the next generation. These are just the challenges that everyone faces in Afghanistan if we think about the challenges the women are facing, they are much more than this, in Afghanistan mostly all the families are very conservative families. Nearly four decades of war brought a lot of destruction to the country that even we can't think of, in Afghanistan if you are a girl then it means that you have to obey all the rules and regulations of your family, in some part of Afghanistan even girls do not have the right to choose their life partner. I hope that by getting this scholarship I would be able to raise the level of my knowledge and to help and build the country.
