**12. Essey:**

In grade 10, I was academically good as well as I was active in extra-curricular activities happening around my school. The subjects in grade 10 did not require in-depth knowledge as much as compared to the +2 subjects. This made it easier for me to enjoy the extra-curricular activities, I believe. I remember I used to hang out with my friends a lot during my leisure as well. Life was not that much busy. Having said that, academic strength was still my top priority. As a result, I managed to pull off 76.0% in my 10th grade. I did my schooling from Hetauda Academy. As a consequence, I managed to score 65.70% in my +2. I did my +2 from Everest Florida Higher Secondary School. In contrast to that of +2 schooling, B-Tech in Civil engineering was much time and effort demanding. The subject matters were much deep and specific and they required regular study schedule. Initially, I struggled to get acquainted with the unfamiliar learning methodology in college. The homework submission techniques and requirements, lectures as well as the subject matters themselves were way different than those from the schooling. I decided to reduce my activity from the extra-curricular activities and fun activities to full fill the in-classroom requirements. It was hard but definitely worth it. I used that time to become close to the teachers and the senior students to learn the subject matters with a purpose to succeed academically. As a consequence, I managed to score 8.84 CGPA out of 10 in my Under Graduate Programme in B-Tech in Civil Engineering. I did my Under Graduate Programme in B-Tech in Civil Engineering from JAWAHARLAL NEHRU TECHNOLOGICAL UNIVERSITY HYDERABAD. I have worked hard on my academics and I am happy that it has brought me good results. I wish I was prepared a little before for the transition from school to college though. Anyway, I am happy with my academic achievement and wish to learn more and do even better in the days to come. I would like to make strong network with my mentors and teachers during my M-Tech Programme. I would like to focus more on my personality development as well since I would be working as a profession in career fields after I graduate. I would prepare myself to work in the practical world as a professional. I would like to grow and excel. Conclusively just I want to improve my soft skills.
