To Whom It May Concern

I would like to express my great pleasure to certify that **Priyanka Das Dewan** is personally known to me for the last five years as an enormous worker. She joined **Turbo Power Limited** as a Trainee Engineer in 2015. Within a very short time, due to her extreme dedication and excellent motivation towards work, she was promoted to the position of Assistant Engineer at our Service & Maintenance department. She used to plan her work in advance and critically analyze it before doing that. I observed Priyanka a unique quality of perfect blend of hardware and software of engineering which is the state of the art of technology.

During her three-year term in the Customer Service Department, Priyanka developed familiarity with contracts and estimating protocols and procedures, as well as related programs enabling her to provide a customized approach and cost-effective solutions for customers and subcontractors. She will never say "NO" to any kind of work if it is under strong ethics.

Moreover, Priyanka's capability of listening, speaking, and writing English is above the competent level which is reflected from her IELTS score. I am confident that she will not face any difficulty in carrying out her postgraduate research in an English environment. Her adept ability to address and resolve complaints and help diffuse volatile situations made her a vital part of the team. She is a careful and creative thinker with an eye for details and a devotion to logic, which serves her well both in the sciences and outside them.

As an Assistant Engineer, Priyanka has proved to be an invaluable resource and a very good ambassador for her brands. Her academic integrity and depth of knowledge are such that she can explain anything very easily with practical examples, her duties included the preparation of complex financial reports and proposals (weekly, quarterly) to submit to her superiors. Priyanka's plan to pursue her postgraduate degree out of state marks yet another accomplishment toward achieving distinct and true success in business and life. While I am saddened to see her leave I do no doubt that she will be fully successful in her future academic endeavors.
