The life of a human being is both uncertain and short. Despite their short life, many people achieve immortality through thoughts and actions. That is why we should live an eventful life as we do not have regrets when looking back and thinking about what we could have accomplished. We do not have any control over our time on earth, but we have control over how we can spend it. An incident made me realize the uncertain nature of human life. I was in my third year, getting my B.s.c in civil engineering degree. Semester finals were ongoing. We found out our friend named Sukanto was not feeling well and admitted to the hospital. He was the most decent, friendly, caring friend we've ever known and anyone would find him first standing smiling beside to support in need. At first, we suspected it might be dengue fever or just a headache. However, the doctor informed us it was a severe problem and recommended consultation with a neuro specialist. Consulting the specialist, he said," Sukanto is infected with a virus called viral encephalitis. It attacks the human brain, and Sukanto's condition is critical. He needs an operation in the brain, and it will cost BDT 60,00,000/-." These were the doctor's exact words and it was beyond anyone's expectations. He belonged to a very underprivileged family, and they could not bear the cost. Then we, along with friends from my university took responsibility to gather this hefty amount of money. It was beyond our imagination that our friend would die due to a lack of funding for treatment. We even went to different districts and wanted help from people for the sake of humanity. We gathered a meaningful amount with the help of people around us and former students of our university. While we were collecting money, our friend Sukanto went to India for better treatment. Meanwhile, we had done everything we could do. Unfortunately, that was not enough. After the surgery, he went into a coma, and after struggling for 30 days with death he left us forever and moved on to a better place. Within a matter of seconds, his presence, memories and this unanticipated departure came in front of our eyes. He was a person with hopes and wills to fulfil his dreams, which will never come true. We say that death is uncertain, my friend's death showed me how uncertain life could be! We all share the same kind of dreams as my friend Sukanto and, these dreams are precarious like our life. This incident made me realize that living a materialistic life is a waste of time, dare I say it is a waste of life itself. Rather, we should live a life that is full of authenticity, purpose and empathy. One day, we will not be here, but our work will remain. We will be remembered by the legacy we leave behind and that is what truly makes us immortal.

### 13. Course applied for

Post Graduate

### Course Type
