Letter of Recommendation for Ph.D.

To whom it may concern

I know Mr. Shubhra Kamal Nandi since the last one and half years, after he registered in my course on Solidification Processing (ME550) during the second semester of AY 2019-2020. I found him to be an intelligent and sincere student because of the types of questions he used to ask in the class and his score. He could earn the second-highest grade (A-), which only one or two students get. He is a passionate learner, which got highlighted through his term paper presentation on heat treatment of additively manufactured components. The work clearly showed his ability to deliver a clear, concise, and well-thought presentation.

Apart from the course work, he has also been doing very well in his MTech thesis research and published one paper in Manufacturing Science and Engineering Conference - ASME, University of Cincinnati, Ohio, USA, June 21-25, 2021.

His personality makes it easy for him to connect with anyone. I respect his decision to further pursue his specific research interests at your institute/university. I am confident that he will be a valuable asset and addition to your PhD program, where he could develop and apply his extraordinary talents.

With best regards

Samir Chandra Roy
