

Letter of Recommendation

Dear Admissions Committee Members:

It is with much pleasure and enthusiasm that I am writing to you to support the candidacy of **Mr. Abhishek Jaiswal** for admission to the Mechanical Engineering Department's Graduate Program at your prestigious institute. I know him for the past two years as his professor in Mechanical Engineering Dept. I took a course on "Materials Characterization Techniques" where I got a chance to interact with him. Soon I realized he is a student of a creative mindset and a positive approach to learning tough concepts. Having fortified my belief in his capacity to excel in concepts about Materials Science & Engineering, I have realized his overarching interest in building a professional career following the completion of his Doctoral. I sincerely hope that he gets an opportunity at your esteemed university to finally help set his goals in motion.

Abhishek's penetrating mind allows her not only to grasp the basics of our curriculum but also to formulate highly original and persuasive interpretative arguments. Fueled by his proactive approach to learning, Abhishek always came to my classes prepared, imparting ideas as much as he could while collaborating with his peers on interesting debates. He rarely failed to contribute to regular class discussions, owing to which, I was able to identify his potential to pursue further studies at an early stage of our association.

I got impressed with innovative methods to solve the problems that he induced in the classroom sessions and he scored well in the semester examinations. Apart from the classes, he performed all the experiments amazingly that was assigned to him under the course. I still remember his proactive approach to handle all the experiments. I was surprised to see his deep knowledge to deal with the lab experiments such as Hardness testing and the study of surface roughness. He was very quick to calculate the ASTM grain size measurement of different microstructures. He has successfully completed the complex and difficult assignments that would not usually be entrusted to students.

Hence, such an ardent approach to learning, in my opinion, should never go unnoticed, which is why I am extending this formal recommendation for him in full confidence.

Please feel free to contact me in case you have any sort of questions.

Sincerely

Dr. Dan Sathiaraj

Assistant Professor

Dept. of Mechanical Engineering

IIT Indore
