**RECOMMENDATION LETTER FOR MR. AKSHIT MEHTA**

Mr. Akshit Mehta is known to me over the last year of his study at the Indian Institute Of Technology, Delhi, India. He is pursuing an M.Sc. in physics. He was selected for this M.Sc program through a very competitive national level entrance test. I.I.T Delhi is one of the top institutes in the country, and only excellent students get a chance to study here. Hence, He is definitely among the top students in the country.

I have taught him Solid State Physics, in which his performance has been very good. He was regular in the class. Akshit has always shown keen interest in his course work. He was quite sincere and hard working. He is well organized and detail-oriented in his approach to physics. Apart from academics, he has a keen interest in sports and keeps participating in quiz contests. He has also taken part in programs related to social service like career awareness.

Akshit has good communication skills. Given the rigorous training he has undergone in his Masters, I am sure and confident that he would perform very well in studies related to Physics: both course work and research.

I strongly recommend him for admission at your esteemed university. Please, feel free to contact me for any further information about Mr. Akshit Mehta
