

I am writing to express my interest in the doctoral program in the department of physics at your university,

as it has always been my age-long ambition to become a scientist. Therefore, I would like to apply for the

mentioned position and am interested to be a part of your team. I have always been interested in small yet powerful chips that can make everyday life easier and more convenient. As long as I had decided to take on physics as my career, I have nothing but seeing my interest getting increased.

At the moment I am pursuing my Master's degree (M.Sc.) in Physics from "Indian Institute of Technology

Delhi". I have finished my Bachelor's degree (B.Sc. Honours Physics) from "University of Delhi". All the

courses I have attended are mentioned in the attached documents (Transcript of Records).

I believe that there is no better place to continue my academic career in physics than this because I consider it a very rich experience to get the opportunity to meet students from all over the world and share

our ideas and learnings. I see this as an opportunity to optimally contribute and develop my knowledge and

experience, which would be essential for my professional and personal development.

in previous projects I was able to demonstrate particularly strong communication skills, a high willingness

to learn and a lot of creativity. I would contribute by bringing my hard work, reliability and innovation skills to

the team. I believe that I am a very diligent, highly motivated student and I have what it takes to be a successful and effective candidate. I am certain to push through with the dedication I have always worked

with to accomplish my goals and gain more knowledge and insight into physics.

For your convenience, I have attached my curriculum vitae for your review. Please feel free to contact me

via email to arrange a meeting for any open questions or an interview to better present my qualifications, if needed. Looking forward for your reply.
