## **To Whomsoever It May Concern**

**Mr. Nadar Allwyn** is our M.Sc. student of 2018-20 batch in Department of Chemistry, Pondicherry University. As a class teacher, I knew the student very well for more than two years and he is brilliant, smart and very active student. He is very good in understanding the subjects and communicating in English fluently (read, write & speak) and also a genuine personality. In his master degree, he has studied all specialized subjects in Chemistry such as organic, inorganic, physical, analytical and theoretical chemistry, and he passed out in May 2020 and placed **First class with 8.94 CGPA** (Cumulative Grade Point Average) out of 10. To his credit, he has qualified in the national eligibility tests such as **CSIR-UGC-JRF** (Junior Research Fellowship) and **GATE**, to do higher education & research in India.

In the research aspects, he carried out the "Summer Research Fellowship Programme 2019" at IIT-Madras sponsored by the Indian Academy of Sciences, and then participated in few National conferences in chemistry too. He is very keen and self-enthusiastic fellow to develop his research skills, and therefore I strongly believe that he will be the suitable candidate for Ph.D. in your esteemed institution.

As a class teacher, the I can justify that this candidate is outstanding and place him as Top-5 among his batch (MSc. 2018-20) consists of 60 students. So, I **strongly recommend** **Mr. Nadar Allwyn** for the fellowship/ programme which he applied for the consideration.

Sincerely yours,

(Dr. R. PADMANABAN)
