To Whom It May Concern

It is a great pleasure to write a recommendation letter in support of Anindya Sundar Dey who is an applicant for the Joint Doctoral Program of IIT Kharagpur and University of Manchester. Anindya has completed his Dual Degree course in Biotechnology and Biochemical Engineering from the department of Biotechnology, IIT Kharagpur. I know him for more than 5 years. I have been his faculty advisor since his first year and I have also taught him several theory and laboratory courses. I found him to be an outstanding student with excellent academic interest. He has a very good academic track record and is among the top 5 percent of students in the class. As a teacher I found him to be a very good student and very attentive during lectures. His interest towards the subject and his ability to pick up things quickly has always impressed me. He performed very well in microbiology, bioinformatics, environmental biotechnology, and microbial genomics and metagenomics, which are relevant to the program. He did his Bachelor's and Master's project entitled, "Evaluation of Low Density Polyethylene (LDPE) Biodegradation Potential of Natural Microbiome and Individual Strains" in the department of Biotechnology. Anindya is very hard working and intelligent person and possess a very pleasant personality. He is soft spoken and has very good communication skills. He is a very good speaker and a patient listener and possesses all qualities to become a successful researcher and an academician. I therefore strongly and enthusiastically recommend Anindya for the doctoral position.
