To whomsoever it may concern,

It's my pleasure to recommend Anjali Jayakumar for admission to a PhD program at your prestigious institution. I have known her quite well for 4 years. During her study at SRM Institute of Science and Technology, I was her instructor for 2 elective courses and 2 laboratory courses which were: Enzyme engineering & technology, Bioreactor design, Bioprocess & enzyme technology laboratory, and Bioprocess engineering laboratory. She also carried-out her undergraduate research projects and internships under my guidance.

Anjali is an enthusiastic learner with great intellectual acumen. She had performed consistently well in all the courses that I had taught her. She was always punctual to my class, very attentive to my lecture and she used to eagerly solve all the numerical problems that were discussed in the class. She even bagged some scholarships for her outstanding academic performance at the Institute. She joined my lab during her sophomore year, as an undergraduate research student. She had tremendously improved since then in terms of her laboratory skills and overall research exposure. Throughout her research acquaintance with me, I found her to be extremely passionate about her work, she used to critically analyse problems and find logical solutions to it. She was extremely supportive to her lab mates. She used to have a great rapport with her seniors and had learned a lot of skills from them. Moreover, she used to aptly mentor her juniors and I am very much satisfied with how she turned out to be a good example to them.

She has excellent proficiency in English. She had amazingly presented her research projects at a couple of international conferences and had won the best poster presentation award at one of them. She had also published 5 of her research projects carried-out under my guidance in reputed scientific journals. Apart from academics, she used to actively involve herself in extra-curricular activities. She used to take up positions of responsibility to organize various events during the inter-college technical fests. She functioned as the representative of her class for a year and efficiently performed her duty to bridge the gap between her classmates and the departmental faculty members. It's noteworthy to mention that she was awarded a certificate by the Department of Biotechnology of our institute on the day of her farewell in appreciation of her 'Excellence in Attitude'. Due to her consistent efforts, she was able to crack the 'Graduate Aptitude Test in Engineering 2019-Biotechnology' with a very high score, as a result of which she is now enrolled in a postgraduate program at the Indian Institute of Technology Guwahati.

She is undoubtedly a competent candidate for the PhD program offered by your renowned institution. I strongly believe that this opportunity will help her to fine-tune her intellectual ability. If given a chance, she'll definitely be a positive asset to the program. Hence, I strongly recommend Anjali. If you have any queries in this regard, please feel free to contact me.

Regards,

Wd/R
(Mrs. P. Radha)
