Recommendation letter for MOHAMMAD ANSAR.V

I know Mr. MOHAMMAD ANSAR.V since he took admission in Rubber Technology center, IIT Kharagpur for M.Tech course in 2016-2018. Mr. Mohammad Ansar did five of my course Rubber Laboratory-I, Rheology and Processing of Rubber, Rubber Compounding and Reinforcing Materials, Adhesion Science and Technology and Rubber Product Manufacturing Technology. I got to know about his technical skills and positive attitude towards his subject through my interaction with him during and after the class I conducted. Through this course he developed excellent fundamentals on synthesis, compounding, processing and testing of rubber

He did his masters research at Indian rubber manufacturers researchers association (IRMRA), Mumbai topic entitled with synthesis of caster oil extended epoxidized Natural Rubber and study its properties under joint guidance of me and Mrs. Suchismita Sahoo (Assistant Director, IRMRA, Mumbai) I have heard very good positive feedback from her and other members in IRMRA.

Summarizing all the details about Mr. Mohammad Ansar I would highly recommend him for the Ph.D. program in your university with best possible funding and I wish him all the best for his future career

I wish him success in his future research profession. If you need any additional materials or information, I will be happy to provide the same.

Thanking you,

With kind regards,

Yours sincerely,

(Dr. Narayan Chandra Das)
Associate Professor
Rubber Technology Centre
