**Recommendation Letter for Mohammad Ansar**

I know Mr. Mohammad Ansar since he joined as the Senior Project Engineer under my supervision from 1<sup>st</sup> November 2018 onwards at Sree Chitra Tirunal Institute for Medical Sciences and Technology (SCTIMST), Trivandrum, India.

I was the major member in his recruitment panel at this institute and through the interview process, I found that his fundamental subject knowledge was excellent with good oral and presentation skills.

He is currently working in a special project entitled "Parylene Coating in implantable medical devices and device delivery systems". The nature of his work is highly interdisciplinary and I found that he is very flexible, adaptable and hardworking on his responsibilities.

As part of the work, he communicates with many dignitaries as well as with companies for the procurement of services. He works beyond working hours deeply digging into the research and often comes up with creative ideas and novel methodologies. His systematic way of recording day to day research activities will be highly beneficial to plan our future works. He also involved in many involuntary activities such as effective communicating with public about different research activities carried out in our organization.

He is also enthusiastic in delivering insights to his colleges based on the technical know-how. He has also impressed me with his decision making skills and perseverance attitude to bring together various aspects to accomplish the tasks assigned to him.

So I strongly recommend him for Ph. D at your university with best available scholarship and I wish all the best for his future endeavors

**Dr. P. RAMESH**
