To whom it May concern

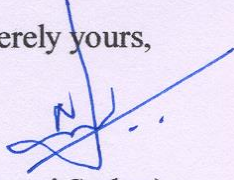

The applicant Mr. Bhrigu Chakraborty is a final year M. Sc student from our department of this institute in this year. Being a teacher I have been in contact with him for more than a year. He had completed B.Sc in Chemistry as major from Calcutta University, Kolkata, which is a prestigious institution for basic science education in our state. So far I know he is the top 10% students in his class, in his B.Sc. Chemistry (Hons.) examination and also in the M.Sc. program which he is continuing.

He has taken one of my course (Group Theory for Chemists) in the first semester. He is a very sincere student, asking many questions in the class and always solve the assignments meticulously and submitted in the appropriate time. He is a hard-working, intelligent, motivated and disciplined Chemist having strong interest in Theoretical Chemistry and who is always willing to learn new things. His knowledge in Physical Chemistry is sound and also he has sound basics in the other branches of Chemistry as well. Bhrigu has done several short research projects in diverse fields in other laboratory also. It shows his fascination about research. I believe with his strong academic background and initial training in research he will be competent enough to learn new experimental things from any good laboratory around the globe. I am strongly recommending him for the Graduate fellowship in your university. I wish all the success in his future endeavor. If you have any questions regarding Bhrigu, please feel free to ask me.

Thanking you,

With best regards,

Sincerely yours,
