

# DEPARTMENT OF CIVIL ENGINEERING

## INTEGRAL UNIVERSITY

Set up under UP State Act No. 9 of 2004, Recognized by (UGC, AICTE, NCTE, PCI, NAAC, MCI, UGC-DEB)

### To Whom It May Concern

I know Mr. Mohd Faraz Khan for the 4 years he was studying as an undergraduate student, at the Department of Civil Engineering. Faraz is a very good student and very energetic. He is an intelligent person and always achieved ranks among the top students in his class. The first thing that will strike about his persona is his confidence and leadership qualities. He always listens to teachers' advice and tries to implement them for the betterment of his career. I had also guided him for multiple academic queries, and have known him closely being the faculty-in-charge for his academic program. In addition to this, he has also regularly interacted with me as an active participant in the organization of technical seminars and conferences at our department. He has maintained a commendable track record in academics along with being highly involved in co-curricular and extra-curricular activities at this institute.

He has always impressed the faculties of the department by participating actively in the class and showing his urge to learn more on a particular topic. He has developed very good laboratory skills during his practical classes and various internships that he has undertaken during his undergraduate courses. He has also undertaken few projects concentrating in the same at the Department Of Civil Engineering during his undergraduate course period. He has also performed well in IELTS and other competitive exams.

Faraz is an honest person and never resorted to any kind of unfair practices. He gracefully accepts failures but always tries to learn from his mistakes. He is eloquent in English, Hindi language. He can effectively put across his ideas to an audience and has very sharp leadership qualities. He has actively volunteered in several activities successfully organized by the department. I strongly recommend him for your higher studies program and I am convinced that he will live up to your level of expectation. I wish him best for his future and I will be glad to clarify any further queries about Faraz in future.

Dr. Sabih Ahmad 30.4.19.

Associate Professor

Department of Civil

Engineering Department of Civil Engineering

Integral University, Lucknow, India
