Recommendation letter for Miss Kabira Sabnam

It is with great pleasure that I am writing this letter of recommendation for Miss Kabira Sabnam who is currently in her final semester of Master's programme offered by the Department of Chemistry, IIT Kharagpur.

I've had the opportunity to know her for now almost 2 years, both inside and outside the class. Through many interactions, especially when she was attending my course on **Rational Drug Design**, I have watched her grow into an outstanding individual who excels in both academic and personal pursuits. I have closely followed her performance in class where he had been very interactive. I was really impressed with her performance in the course in which she did very well.

Kabira has very good academic record throughout; she earned her Bachelor's degree from Calcutta University with a first class. After qualifying in the tough All-India level JAM examination, she joined the Master's programme at IIT Kharagpur. Kabira is intelligent, sincere and hardworking and has great potential to carry out research in any state-of-the-art laboratory doing top level research. She has developed great interest in various aspects of protein chemistry, in particular protein hydrogels for health care applications.

She has good command over English, both spoken and in writing.

In summary, Kabira has all the virtues which are expected from a researcher of high calibre aspiring to get admission in the joint PhD program of IIT Kharagpur and University of Manchester for which she has my strongest support.

Sincerely yours

A handwritten signature in blue ink, appearing to read 'A. Basak', with a long horizontal flourish extending to the right.
