Professor

Dated 11-8-2020

Subject: Letter of Recommendation for Mr. Kaustubh Khot

To Whom It May Concern

It is my pleasure to recommend Mr. Kaustubh Khot, who has completed his M. Tech degree in 2015 from the Department of Metallurgical and Materials Engineering, Indian Institute of Technology Kharagpur, India. Earlier, he got his Bachelor's degree in Mechanical Engineering from ITM Gwalior, India in 2012. The academics at IIT Kharagpur are most challenging and Kaustubh fulfilled all the requirements with the added challenge of honors and advanced courses.

During his M. Tech, he got exposed to the state of the art facilities and undoubtedly has acquired very valuable experience during his tenure at IIT Kharagpur. Being one of his course instructor, I was quite impressed by his ability to complete all work assigned to him on time, if not before it was due. He is always thorough, methodical and comprehensive, and his fact checking is always accurate. His intelligence in tackling problems and experimental skill enables him to obtain his Master degree.

Mr. Khot is a very conscientious and motivated researcher with a commendable sincerity and integrity. He has shown ample promise of a successful researcher capable of independent research and meticulous project supervision. A person like Kaustubh Khot will be an invaluable addition to any research laboratory. I am recommending him for the appropriate position strongly, enthusiastically and absolutely without any reservations.

(Koushik Biswas)
