To Whom It May Concern

Letter of Recommendation for **Sunandan Naha**

It is with great pleasure that I write this letter of recommendation for **Sunandan Naha**. He is known to me for more than two years and during my long interactions with Sunandan, I found him to be very much motivated in taking up research as his career. His analytical bent of mind, strong theoretical background and reasoning abilities convinced me of his proficient research aptitude.

I had sufficient opportunity to observe him closely and to assess his capabilities and personality. His dedication and zeal towards the work as well as his analytical skills are praiseworthy. His sound academic background, ability to think independently and his practicability in tackling innovative problems make him an ideal researcher. He has excellent knowledge in the field of Chemical / Biochemical Engineering and Environmental Engineering. Besides, he has very good knowledge of Environmental Biotechnology and Bioprocess Engineering. He has served as Teaching Assistant of many subjects in our department. His sharp knowledge in aforementioned subjects convinced me that he can be a potential researcher especially in interdisciplinary areas.

In brief, I give him my strong recommendation. His excellent academic and research records along with his dedication and analytical skills make me rate him amongst the top 1% of the researchers with whom I have interacted. He would be a good asset for any organization or department and therefore I urge you to consider his candidature for the PhD position.

I would be happy to give you any further information in this regard.

I wish success in his future endeavours.

Thank you and regards,

Surajbhan Sevda
