

### Letter of Recommendation

To whom it may concern,

It's my great pleasure to write this letter in support of Eng. Omar Al-Masalmeh's application to your esteemed university.

As a lecturer and supervisor in the master's degree program of Sustainable Engineering Design & Construction (STDC) at the British University in Egypt (BUE), I have known Eng. Omar Kassem Al-Masalmeh (Matriculation No. STDC91630012) for one year.

Eng. Al-Masalmeh had successfully completed all of his modules with CGPA 3.7 of 4 and defended in public his master's dissertation with grade of 93%. He published the results within two research papers in the peer reviewed conference 22<sup>nd</sup> International Water Technology Conference (IWTC-XXII), 12-13 September 2019, Ismailia, Egypt, and got the award of best paper in the session of Water Resources Planning and Management (WR) (A).

He was unquestionably one of the most able students in our programme. He often asked for further clarification of points covered in the lectures and delivered his reports always on time.

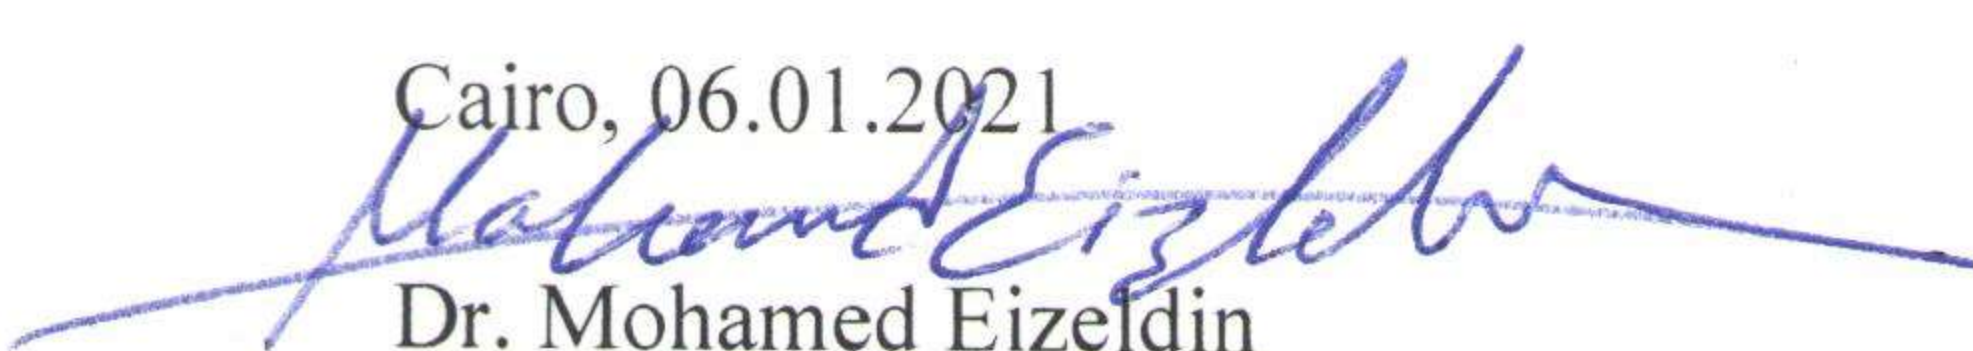

His achievements stand out all the more because of the fragile financial situation that he had to deal with on a day to day basis. Certainly, he seemed to get on well with classmates and teachers at all times, and I imagine that he will do the same when he is in your university.

Based on my observation of his abilities and motivations for scientific research, I strongly believe he has the potential to be an outstanding researcher at your university. I therefore recommend him for admission to your programme.

If you require any additional information, you may contact me via the address and numbers mentioned below of this letter.

Sincerely,

Cairo, 06.01.2021

  
Dr. Mohamed Eizeldin
