TO WHOMSOEVER IT MAY CONCERN

It gives me immense pleasure to recommend Mr. Sanchit Sood s/o Mr. Paramjit Sood, Roll No.19AG64R13, for admission into Dual Ph.D. programme with University of Manchester, UK. As a student Sanchit is extremely dedicated and diligent. He has been working with a tremendous amount of perseverance and dedication, which I rate as one of the most important characteristics a student should possess. During my teaching experience, I have come across a wide spectrum of students and I would place him amongst the top 2% that I have taught. He ranks among the top students in his class. He has continued to maintain the high level of academic attainment. From my interactions with him and even from the class room discussions I could make out that he has a thorough understanding of fundamentals and evinces keen interest in his studies. He always impressed me through understanding of the underlying concepts. His zest to acquire knowledge is appreciable.

In my lecture he evidently demonstrated his experimental skills and research aptitude. I feel that his pragmatic analysis represent his competency towards research. He has good problem-solving skills. His self-confidence and optimistic approach to solve even the most difficult problems are worth mentioning. Sanchit has excellent communication skills. His written work is clear and concise, as well as interesting to read. He put in lot of hard work and some of his ideas were innovative.

Sanchit is equally competitive when it came to other extra-curricular activities. The active participation in the inter college events shows his ability to excel in those fields too besides academics. He has won many laurels for the department and the college. Sanchit is an amiable and well-mannered student who works harmoniously in a team. He always finds time to pursue volunteer in social services, cultural fests and departmental club.

Given his abilities and commitment I firmly believe that Sanchit has the potential to undertake Research as part of this joint degree program. I feel that exposure at this level should go a long way in giving

expression to his true potential. I am sure he will represent his research abilities and acumen to in the best manner possible and learn from the world's best experts in the field. I will be happy to provide additional information, if any, to support Mr. Sanchit's application. I wish him all the best in his future endeavors.

Kind regards,

Dr. Gorachand Dutta
