### **Recommendation Letter**

I am delighted to recommend Ms Saurya Nayak as a highly ambitious applicant for a PhD course at the prestigious Indian Institute of Technology, Kharagpur. I know her very well since the year 2018 as a course instructor for more than 2 papers. Her academic records are excellent and she has also maintained a CGPA of more than 9.0 out of 10 up to the V<sup>th</sup> Semester. I have closely observed her inquisitive nature towards the subjects taught in my class. The way she grasps the concepts and response during lectures was quite amazing. Even after setting a tough examination paper during the final exams, she scored grade 'A' in my subject. Based on all these, I can comment on her that whatever harsh conditions will be going to be in her future academics. She will try hard to figure out the solutions.

At last, I am assuring you that if she is given a chance to carry out the PhD work, definitely she will succeed in her research and academic career. I have my constant support and best wishes for her future endeavours.

Kind Regards

Prabodha Ranjan Sahoo
