**TO WHOM IT MAY CONCERN**

It is my great pleasure to strongly recommend Sudeep Mondal to the Dual PhD programme of IIT Kharagpur and University Of Manchester's Mathematics department. I tutored Sudeep from 2017 because he was my student at IIT(ISM) Dhanbad and he worked in my project "Analytical Investigation and Operational Rule for Double Laplace Transformation". We had discussed the scope of the project and I gave him some background reading at our first meeting. By the time of our second meeting he had read what I gave to him and prepared a summary of the project. This level of effort is typical of a good student who joins my lab, so I agreed to take him in this project.

During his time in my lab, Sudeep demonstrate a good ethic and interpersonal skill. We outlined a scope of work to be completed and he successfully completed the work in the time required. The quality of his research work on his dissertation-project was compelling, and he managed to find beautiful simple solution to very challenging problems. I tied him up with another student to work on the project. He seems to work well and I found him excited to work with others. He always made many valuable contribution to group discussion. Finally, it should not be left unmentioned that Sudeep is a very pleasant person to work with.

I strongly recommend Sudeep's decision to further pursue his specific research interest at your institution and I am confident that he will be a highly valuable addition to your PhD programme. If you have any questions regard to Sudeep Mondal, I will be pleased to answer them.
