RECOMMENDATION LETTER

February 11, 2022

It gives me immense pleasure to bear the testimony of **Mr. Praveen Kumar**, who has known me for one year as a student of a graduate course. He is currently pursuing his master's in Energy Science & Technology, Energy Institute Bengaluru, An Institution of National Importance, MoPNG, Govt. of India. Besides his academic activities, I would like to point out that he is involved in active research on **Energy Storage and Conversion**. He has handled various laboratory instruments such as spin coating, dip coating, UV-VIS spectrophotometer, magnetron sputtering, and electrochemical workstation. As a productive student, **Mr. Praveen** has participated in several international workshops and conferences where he gained much knowledge about **Physical and Electrochemical characterization**. He also registered an **Indian Patent** and has sound knowledge in Computer software (Origin 8.5, X-Pert Highscore Plus, Image J, Zview, MATLAB) required for research work besides M.S. Office, Word, and Mendeley.

Mr. Praveen has been actively exploited in a few projects as an independent or a group member with International renowned groups. His easily adoptable cross-culture and flexibility allowed him to visit and work with different institutes in India for characterization purposes. During his journey from his undergraduate, he witnessed his cross-culture adaptability and flexibility towards the work with all sincerity. He offers all the qualities of a good leader and all of the characteristics desirable in an ideal researcher. I strongly recommend Mr. Praveen Kumar for his Ph.D. study. Therefore, this position helps him and the University and, in turn, to India. I'm sure that he will prove his talent with appreciable contributions and an asset to the University.

I wish him success in all endeavors.

If you need any further information, please feel free to contact me.

Sincerely,

Dr. G.R. Dillip
