### LETTER OF RECOMMENDATION

It gives me a pleasure to write this recommendation letter for my student Mr. Praveen Kumar, who pursued his Bachelor's degree in Nanotechnology at Bharath Institute of Higher Education and Research, Chennai, India. He is very much interested to carry out his Ph.D. program at your esteemed university. I know him for the past 6 years as a student of my class and I taught courses such as synthesis methodologies of nanomaterials and photonic devices. In my observation, Praveen Kumar is a Conceptual and dedicated student with the desires to acquire knowledge in the subjects with good analytical skills. His curiosity, confidence and interest along with his dedication to work and explore new concepts in the academics led him to pursue his study in master's degree in a central government institute. He has the capability to complete tasks assigned to him or as team person with minimum guidance.

Besides the academic record, Mr. Praveen Kumar's participation in various national and international level workshops and conference, displayed his interest to learn contemporary techniques and encounter challenges in competitions to improvise his technical skills. He is able to complete a given task within the stipulated period. Praveen Kumar besides being an independent thinker, I often observed him as sincere student. I feel that his diligence and pragmatic analysis represent his competence towards research.

He is interested in executing academic activities such as debates and discussions on a specific. He worked closely with the management in organizing technical fests and cultural events. I am sure that he will execute the academic and research activities of the department with motivation.

Therefore, I recommend Mr. Praveen Kumar for his Ph.D. degree admission at your esteemed University and if you are in need of any further assistance, please do contact, I am ready to provide you the information.

Yours sincerely

(Velavan Ramasamy)
