To whom it may concern

Reference letter for Mr. Alex Shaji, IISER Trivandrum

I am happy to write this letter of recommendation for Alex Shaji, who has successfully completed his three-month summer internship under my supervision. His project report is a computational work titled as 'An Overview of Photonic Structures'. During the internship, he participated in group meetings and was able to present an irradiance profile of 2D photonic structures using MATLAB. He quickly learned the mechanisms and applications of these Photonic crystal structures.

He is a problem-solver who knows how to quickly clear his doubts and go forward in his research, which is one of his best attributes. With the support of my PhD student who acted as his co-guide, he produced good outcomes which demonstrated his depth of understanding. He possesses an incredible work ethic and constantly attempts to improve himself.

During my interaction with him, I noticed his excitement and enthusiasm to pursue doctoral studies. He was highly dedicated and committed to learning. He has all the required skills and attributes for an ideal candidate for any research program. I am happy to recommend Alex Shaji for Doctoral studies at any leading university. I wish him success in all future endeavors.

Warm Regards,

Prof. Joby Joseph, Head, Optics and Photonics Centre
Department of Physics (Joint Faculty)
