To whom it may concern

It is a great pleasure for me to recommend Mr. Aritra Hota student of final year B.Tech program in Computer Science & Engineering of Haldia Institute of Technology. I have known him for over 3 years as my mentee and so can appraise his abilities. As an Asst. Professor ofComputer Science & Engineering of Haldia Institute of Technology I have published 10 research papers in peer reviewed journals and international conferences and he has been preparing himself for higher studies under my guidance.

He is extremely dedicated, hardworking and shows a profound interest in contributing to the welfare of others. Not only he finishes the given work within the given time, but also brings perfection to a given task.

I have no doubt that Aritra clearly has the skills and talents necessary to succeed in his Joint PhD program and I think that it is his intense interest and passion for Computer science and desire to help people with his skill set that will enable him to excel.

I believe that Aritra will excel at his PhD program in Computer Science and I recommend him highly. I think he will be a great asset to your school and I am very much eager to see the contributions he will make in the field of Computer Science. Please feel free to contact me if you have any questions regarding this recommendation.
