TESTIMONIAL

I have great pleasure in writing a reference letter on behalf of **Mr. Athul K.** I have known Mr. Athul personally for the last two years as my M.Sc. student. He has completed his Bachelors and Masters in Chemistry with distinction from the University of Calicut. Also, I am happy to mention that he has some work experience in some R&D Institutes. He worked as an Adhoc- Technical Assistant B-Tech laboratory of Post Graduate Department of Chemistry, **National Institute of Technology (NIT), Calicut, Kerala, India.** Later as Project Assistant in a project titled "Water Quality Monitoring" at **the Centre for Water Resources Development and Management (KSCSTE-CWRDM), Calicut, Kerala, India**

As part of the masters programme, Mr. Athul has carried out a project titled "Synthesis, Characterization and Phase Transition Properties of a Chiral Cyclohexanone Compound". Currently, he is working as Junior Research Fellow at **Centre for Nano and Soft Matter Science, Bangalore,** in Liquid Crystals synthesis under Dr. C.V Yelamaggad. Mr. Athul is intelligent, highly creative, and hard-working. He has the necessary initiative, sustained interest, and the ability to put in hard work, essential for completing a project. He takes a keen interest in discussions and seminars and has developed a clear understanding of significant aspects of chemistry.

Finally, I am happy to mention that Mr. Athul bears an excellent character and exemplary conduct. He gets along well with his colleagues and friends. I am strongly recommending him for any position that requires hard work and dedication.
