LETTER OF RECOMMENDATION

I know **Mr. Augustine Jaison** personally for the last three years as a student of Post-graduate programmer in Chemistry at the Research & Postgraduate Department of Chemistry, St. George's College, Aruvithura. He has successfully completed the MSc programme of Mahatma Gandhi University in 2020 with a cumulative grade point average of 3.4 out of 4, which is equivalent to a percentile score of 85.

Mr. Augustine Jaison evolved as a dependable, intelligent, co-operative and emotionally stable person during his period of study here and his pedagogical skill was commendable. I believe his commitment to work and persistent effort to excel make an eligible candidate for your prestigious institution. The MSc (master's level) programme of Mahatma Gandhi University comprised four semesters, covering all the advanced topics in Chemistry. Mr. Augustine Jaison distinguished himself by submitting an exceptionally well researched and interesting project entitled "**Green Silver nanoparticle synthesis from Carica Papaya fruit extract**". The work focuses on Microwave assisted synthesis using phytochemicals extracted from medicinally important plant Carica Papaya, an efficient green approach for nanoparticle synthesis.

I would rank him in the top 5% of students that I have taught in the past five years in respect of his writing ability and research skills.

It is my pleasure to recommend Augustine for admission to PhD program at your University. If I can be of any further assistance, or provide you with any further information, please do not hesitate to contact me.

Yours sincerely,

Tessymol Mathew
