LETTER OF RECOMMENDATION

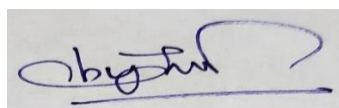

I am really glad to recommend Augustine Jaison who has been my student for the last two years during his postgraduate studies. He undoubtedly is one of the most talented students I have instructed and also achieved good academic results.

Augustine is a disciplined and punctual person with good social skills. He is receptive to new ideas and displayed exceptional qualities of leadership, persistence along with good research skills. I always recognised him as a responsible person who is uniquely adaptive. He always made efforts to lead his team and present his ideas coherently. He was one of our finest, most adaptable student.

Mr. Augustine Jaison submitted an exceptionally well researched and interesting project entitled "**Green Silver nanoparticle synthesis from Carica Papaya fruit extract**" under my supervision, in which we were able to synthesize silver nanoparticles using greener method and testing the catalytic activity of the same.

It is my pleasure to recommend Augustine for admission to PhD program at your University. He will undoubtedly be a credit to your institution. If I can be of any further assistance, or provide you with any further information, please do not hesitate to contact me.

Yours sincerely,

Dr. Siby Joseph
