

To Whomever it May Concern

I am delighted to write this letter of recommendation for Mr. Kaarthick K to pursue his research interest, whom I have known since 2017, when he was a bachelor's student (B.Tech. Plastic Technology) at the Central Institute of Plastics Engineering and Technology in Chennai. I instructed him theoretical courses on 'Fundamental of Polymer science' 'Polymer Rheology' and Polymer Blends and Alloys.

Kaarthick used to pay close attention in all my classes. During my lectures, he was really proactive and impressed me with his inquisitiveness and inherent desire to probe deep into the subject. He was a active participant in all the classroom debates we had over the same. His zeal and desire to secure knowledge and perseverance to gain it was evident in my discussions with him. He is not only technically sound but also has good command over written and communication skills which I have clearly observed during his seminars. He maintained good and cordial relationships with his professors and classmates.

Kaarthick served as the class representative for his batch for four years. During his tenure, classes ran smoothly as students and teachers cooperated well. I appreciate his managerial ability in planning and handling the smooth functioning of classes. He also won many prizes in various paper presentation competitions and quiz competitions.

I am confident that Kaarthick will put in his earnest efforts in whatever project he undertakes in future. He is a worthy candidate for the doctoral research program at your University. I wholeheartedly endorse him and wish him well in his research

Thanking You

Yours faithfully

Dr. C MEGANATHAN
