TO WHOM IT MAY CONCERN

It gives me immense pleasure to author this Letter of Recommendation in favor of one of my best students, Zainul Abedin Khan to pursue his higher education at your renowned university. I have known Zainul for more than past four years.

During his coursework in Department of Civil Engineering I had the opportunity to closely interact with him. I taught him Geo Engineering of Rock and Rock Mass during his 8th semester and lab in charge of Engineering Geology Lab during his 3rd semester of bachelor degree and Advance Rock Engineering during his 1st semester and Ground Improvement and Geosynthetics during his 2nd semester of masters studies. His master's thesis titled "Analysis of Twin Tunnels" is also under my supervision. He performed exceptionally well in subjects. Zainul is a good scholar who has always impressed me with his serious and mature approach to pursuing his studies and interests. The way he used to interact during the class greatly showed his inclination towards study. Thus, by observing his academic and all other abilities I would rank him in the most sincere students of the class. Zainul possesses a excellent character and is one of the most highly principled and ethical people that I know. He always demonstrated a strong intellectual and positive attitude. He also has impressive teaching, interpersonal and leadership skills. Further considering his academic credentials, his innate capabilities and determination to succeed, I am sure he will put forth all his effort into any task that he confronts.

I recommend Zainul for PhD Program and fitting full financial assistance. In my view his academic know-how, competence and commitment for research, definitely make him one of the most noteworthy student. By furnishing him a PhD program in your college you will not only give him an opening for career headway but also help him reach the supreme level of accomplishment. Please do not hesitate to contact me for further information if required.
