

## Letter of Recommendation for Karan Chabhadiya

It gives me immense pleasure to recommend Karan for admission to the doctoral degree program. He is one of the exceptional students whom I have taught in 5 years of my teaching. I have known Karan since 2014 and have taught him Environmental Sciences-I, Environmental Sciences-II, Advanced Environmental Instrumentation, Environmental Monitoring and Statistics, Environmental Modelling, and Environmental Chemistry and Microbiology courses. I have seen him cultivate a comprehensive approach to articulate challenging situations through his critical thinking skills while teaching him. His bachelor and master's degree project supervisors were always praiseful of his work ethics. His extreme dedication and hard work in completing the project well within time is a testimony to his research skills and my reason for recommending him.

Based on my personal experience, I find him a sincere, hardworking, and highly motivated student of our department with a strong intellectual ability to analyze and solve complex problems with ease. Karan possesses all the key essential attributes of a successful researcher.

In summary, Karan shows remarkable promise as a young scientist, and I give him my strong recommendation and believe that he will be an asset to any institute that he joins. Should you require any additional information, please do not hesitate to contact me via email or phone.
