Letter of Recommendation

It gives me great pleasure to write the Letter of Recommendation for Mostafa Sameer, who has graduated with distinction from Ahsanullah University of Science and Technology (AUST). He was also a student in one of my courses on "Geotechnical Engineering-II". In addition, he was also a student in one of my based lab. These interactions provide sufficient information to gauge and assess the intellectual capability and the analytical skills he possesses.

Mr. Mostafa is a very enthusiastic student and it was an absolute joy having him in my class. Besides showing his curiosity for the subject by asking relevant questions, he was also very sincere in completing all the assignments on time. In multiple instances, he even approached me outside the classroom for help on the extra topics that he has studied outside my course curriculum. This gave me an idea about his passion and diligence in understanding the subject.

In the Research Project, I came to know about the energetic and keen side of Mr. Mostafa when he and his group partner responded enthusiastically to my suggestion of selecting the project topic themselves.

Mr. Mostafa has an eye for detail and this came to my notice when I have seen him working overtime several times in the lab to achieving perfection in his work. He has always demonstrated a natural leadership ability when it came to making decisions and communicating with me or the other teachers about their work. On their final project presentation, I have observed Mr. Mostafa keenly taking feedback from the Faculties to improve their work and making it more suitable for large-scale implementation. This was proof that, unlike most students, Mr. Mostafa's passion for his work exceeded the status quo of the course.

In my unbiased opinion, Mr. Mostafa is focused, confident and down to earth. In him, I find the commitment desirous of a good student with the right blend of aptitude, merit, and determination. In view of all the above facts, I strongly recommend him, without any hesitation, for admission into the graduate program at your esteemed institution.

A S M Fahad Hossain

Assistant Professor

Department of Civil Engineering

Ahsanullah University of Science & Technology (AUST)
