Dear Sir/Madam,

**Recommendation Letter for Sijuade Onabajo**

In my capacity as the Technical manager of Dharmattan Nigeria Limited, I know and have assessed Mr Sijuade on several grounds ranging from technical competencies to academic prowess. I was his personal trainer and supervisor while he underwent some training and worked for the company. Within the period of his training and work, he showed himself as a disciplined, reliable and conscientious student and colleague with comprehensive knowledge in different areas.

After and while studying for his Bachelor's and Master's programmes in Geoscience, Sijuade demonstrated his deep interest in spear-heading and managing projects, as well as actively participating in extra-curriculum social activities. He has worked closely and interacted with finance and business practitioners, as well and being involved in analysis of various business cases. Such training revealed his exceptional abilities to adapt in new situations and work in teams.

He has led groups and earned respect of both fellow colleagues and managers. Sijuade often initiated group research and study sessions and assisted the company in organizing workshops for young professionals in the company.

In the course of professional stint here, Mr Sijuade showed himself as a responsible, motivated, hard-working colleague with excellent analytical and decision-making skills. His steady academic background, outstanding personal qualities and practical experience allow him to contribute to the chosen programme sharing his expertise and original approach to different issues.

In summary, I can assure you that Mr. Sijuade Onabajo is a very gifted individual and would be a true credit to the research. I recommend him, without reservation, for application to the Joint Doctoral program in Extraction of Geothermal Energy from Abandoned Oil Wells in your university.

Yours sincerely,

Yusuf Odusanwo,  
Technical Manager  
Dharmattan Nigeria Limited
