**Nihar Ranjan Jana, Ph.D.**  
Professor  
School of Bioscience

To whom it may concern

It is a great pleasure to enthusiastically recommend Mr. Srijon Sen, for the PhD position in your group. He has been the student of our institution from September 2020 till date. I first met him as a faculty of Neurochemistry theory course that taught in Spring 2021-22 semester. He performed excellently in my course. I was very much impressed with his academic curiosity. He was very interactive in the class with interesting questions. He possesses consistent and very good academic record throughout his study.

Srijon is doing his Master's thesis work on "Structural and dynamic basis of Peptidyl tRNA hydrolase," which he has presented to our School of Bioscience. During his project work, he has acquired a good literature knowledge on *Mycobacterium tuberculosis*. He has a very good attitude towards learning new subjects as well as new techniques. He has more than one year of wet laboratory experience in our department and is familiar with many techniques commonly used in molecular biology and protein chemistry.

I find Mr. Sen an individual who shows up earlier than asked, works hard, and carries themselves in a polite, respectable manner. He is optimistic and capable of working in a group. In addition, he has a phenomenal grasp of the English language. He can understand spoken English very well and is fluent in his communication skills. I can certify that he is more than capable of pursuing a research problem in English. He is a highly motivated student and puts his sincere efforts to become top class successful researcher.

Therefore, I strongly recommend him for a position as a research scholar in your laboratory. I hope he will be a valuable addition to your research team on a given opportunity. If you have any further questions about him, do not hesitate to contact me.

Yours Sincerely,

*Nihar Ranjan Jana*
