Letter of Recommendation

To whom it may concern,

I am pleased to recommend *__Atefeh Taghavi__* for your PhD Program. I know her for the past five years through her work with Dr. Enrique Herrera- Viedma's team.

After she finished her Ph.D. period, we had collaboration, which was lead to the ISI publication of:

  B. Farhadinia, **A. Taghavi**, "A Single-Valued Extended Hesitant Fuzzy Score-based Technique for Probabilistic Hesitant Fuzzy Multiple Criteria Decision Making",
  Complexity, vol. 2021, Article ID 2454738, 19 pages, 2021.
    https://doi.org/10.1155/2021/2454738

I thoroughly enjoyed my time working with Atefeh; she is honest, dependable, and incredibly hardworking. Beyond that, she is an impressive problem solver who is able to address complex issues strategically and confidently. Atefeh is inspired by challenges and never intimidated by them. Along with her undeniable talent, Atefeh has always been an absolute joy to learn and solve problems. She is a true team player, and always fosters positive discussions and brings the best out of other coworkers and we still want to work on some research projects.

Without a doubt, I confidently recommend Atefeh to join your team as a joint doctoral program in Cryptography and Blockchain at IIT Kharagpur and University of Manchester.

Please feel free to contact me at +98 915 528 0519 if you want to discuss Atefeh' s qualifications and experience further. I would be happy to expand on my recommendation.

With Best Regards,
Prof. Dr. Bahram Farhadinia
Mathematics Dept., Quchan University of Technology, Iran
