## TO WHOM IT MAY CONCERN

In my capacity as Assistant Professor in the Information Technology Department at National Institute of Technology Srinagar, I am submitting this letter in support of Tajamul Ashraf's application for admission to your dignified institution. He is a Bachelor's student of Information Technology Engineering at our university. I have taught him different courses in his bachelor's program. Throughout his course of study, he has shown great interest towards practical aided learning techniques. We engaged in several course and research related discussions in which he confidently talked about his aspirations towards higher education. I believe he deserves to be a part of the diverse student community at your university and propose his name for higher education at your university.

Mr. Tajamul was involved in multiple projects during the course of his study among which the best were "Detection, Classification and semantic segmentation of Apples" and "Deep learning model for finding the variations of coherent factors on climate change". In both these projects he worked closely under my mentorship and has been extremely consistent while carrying out the work. Even though he was not having any prior research experience, he has shown the sincerity and acumen of a good researcher. He was always ready to learn new concepts and step out of his comfort zone for the project.

Apart from academics, Tajamul has a lot of enthusiasm for sports and extra-curricular activities. He has also shown his adeptness at organizational skills, especially in a cross-cultural setting. He is approachable and easy to communicate with.

Lastly, I want to point it out that it is easy to see how diligent and career-driven he is, and works with good determination and commitment to reach his goals. He is hard working, confident and mature and deals with every bit of his work with utmost seriousness and has thus been frequently appreciated for his dedication and acumen. His good planning, organising skills and attitude make him different from most of his peers. Besides this, he has also gained experience in-numerous simple concepts, which are highly valuable.

I, therefore, strongly recommend Mr. Tajamul for higher education at your reputed graduation school and believe that it will further add to his personality.

If you have any questions about this recommendation, please do not hesitate to contact me for I will gladly try to help.

Sincerely

Dr. Janibul Bashir, PhD  
Assistant Professor
