TESTIMONIAL

It is my pleasure as his professor to give letter of recommendation in support of Mr. Tamilazhagan P for the Dual Doctoral Degree Program in Design of Nano-cellulose based self-healing composites with enhanced structural properties; A Sustainable Approach . He is known to me for the past two years. He joined as M.Tech Polymer science and engineering student in the Department of Chemistry on September 2019. He started his research in the area of “Development of water borne Epoxy-CNT Nano hybrid coatings for corrosion Prevention“and he worked in the “Development of PLA blended membranes for the recovery of bioactive materials”.

As credit to his research, he has got Full time Internship Opportunity with a grant at Titan Company Limited in Biopolymers and Biocomposites development project. Currently he is working as a Research Associate at Titan Company Limited for developing Polymer composites for wearables Application

As a professor of Mr. Tamilazhagan P, I keenly observed him. From my observation I can assure that he is a talented, tireless, dynamic and dedicated person. Apart from academic and research activities, he has pleasing manners and can get along nicely with his co-workers and colleagues. His conduct and character are exemplary. Considering all his abilities and his positive approach and outstanding research accomplishments, I strongly recommend Mr. Tamilazhagan P for Dual Doctoral Degree Program at IITKGP-University of Manchester. I shall appreciate your favorable consideration for his application as he is a good researcher.

DR. S. ANGAYARKANNY, M.Phil., Ph.D.,
