RECOMMENDATION LETTER FOR Tamilazhagan P

Mr. Tamilazhagan, is known to me for the past 7 years as a student of my Department. He has performed well in the School Board Exams due to which he secured a seat in the B.Tech (Rubber and Plastics Technology) programme of my Department.

He has picked up well in his comprehension abilities in the subjects of concern, during his studies here. His understanding of the basics of the subjects is good and he is keen to pursue research. His communications skill in Written and spoken English is more than adequate. His grades do not reflect on his academic abilities fully. He also carried out a project work under my supervision on UV curing of Nano silica filled epoxy resins which she did with dedication. He was also a Research Intern at the highly prestigious Titan Company Ltd after his Post Graduate studies on Polymer science and engineering (M.Tech) and currently working as Research Associate in the same company. I note that he has been pursuing research activities in that organization after his Masters' programme. His record in developing products in his present place of work, is impressive.

He is quite keen to pursue research works a seat for him for Doctoral programme will be of great use to him in his endeavors. Hence I recommend that he be given a seat with financial aid in a highly reputed University overseas, for Doctoral programme.
