## Recommendation Letter

It is my pleasure to recommend Ms. K. Nikhila for her application in University of Manchester and IIT Kharagpur Joint Doctoral Program. She is a talented and smart individual. I know her personally for the last five years when I taught a couple of theory courses on Environmental and Inorganic Chemistry and guided a laboratory class in her 2nd and 3rd year of Integrated MSc. (IMSc.) Program at BIT Mesra. During my classes, I came to know her potential and ability to apprehend the subject matter comprehensively. She had shown a lot of interest and communicated her every doubt which reflected her clear thought process. She scored very well in my courses and other subjects to maintain a good CGPA in her curriculum here at BIT Mesra.

From my interaction, I must say that Nikhila is a bright and hardworking student with good skill and knowledge. She has qualified Joint Admission Test for MSc. (JAM) exam with an all-India rank 602 to pursue her MSc in the field of Environmental Science and Engineering at IIT Bombay. She is polite, gentle and maintains cordial relationships with teachers and friends. I find her very much open minded to grasp new field of ideas, which is very important for a promising academic career. She writes very well and can express her ideas with clarity. I can assure you that she will perform well in her PhD and research if given the opportunity.

Finally, I strongly recommend her candidature for her application in University of Manchester and IIT Kharagpur Joint Doctoral Program 2023.

I believe that she will be able to prove her ability and sustain a good reputation of a good scholar with her knowledge and skill. She has good analytical, communication skills, eager to learn new things, good team work skills and balanced emotional quotient.

I strongly recommend her for this Joint Doctoral Program. I wish her success in all her endeavours.

Dr Sumit Mishra
