I am pleased to get the chance to recommend Mohammed Qadeer Mohammed Taheer for the Ph.D. position at your institution. I have taught him Advanced Fluid Dynamics & Computational Fluid Dynamics in the area of Thermal Engineering. I will be delighted to witness him excelling in this particular field.

The topic of Multi-Phase flow in micro-channel proposed by him is vital for the modern-day scenario and needs extensive research. It will be beneficial for all the industry stakeholders in the energy and also academicians who can access real-time insights on the subject.

I also supervised him for his thesis project, Multi-Phase flow in micro-channel. I have witnessed his work efficiency, critical thinking abilities, and inquisitiveness regarding various findings. He also has brilliant communication skills and the ability to mentor and guide peers.

He has a down-to-earth nature and respects others while adhering to rules and regulations. His independence in research projects and studies has been immensely satisfying. He is an analytical thinker and is stimulated by new academic challenges. This trait makes him strive for innovative solutions to real-world problems with a strong desire to improve the world around him.

Hectic timelines, various constraints, tough work conditions, multitasking, and dealing with multiple people along the way, are things that he can tackle with ease while delivering work seamlessly. With these positive abilities, he will be an asset to any institution.

Mohammed Qadeer has improved consistently every time and is a deserving candidate for an opportunity to work in the field of CFD. I would be delighted if my recommendation helps him obtain admission to the Ph.D. in your Department.

If you have any queries regarding research, academics, or other areas about Mohammed Qadeer's candidature, please feel free to reach out.

Sincerely,

Dr. A.V. Deshpande

Assistant Professor in Mechanical Engineering
