I am pleased to acquaint you with one of my most outstanding students, Mohammed Qadeer Mohammed Taheer, who is keen to pursue the Doctor of Philosophy at your esteemed institution.

We've known each other since 2021 when he enrolled in the Master of Technology in Thermal Engineering program at Veermata Jijabai Technological Institute. As part of this programme, He took my course on Convective Heat flow & Microfluidics and joined my technical seminar. I also supervised him for his thesis project, Multi-Phase flow in micro-channel.

He presented outstanding commitment to his studies. He was a quite remarkable student with a strong research interest. Among his peers, he stood out by always being up-to-date with current topical discussions even within niches of microfluidics research. The quality of his research work on his thesis project was compelling, and he managed to find beautifully simple solutions to very challenging problems.

With his multicultural background and fluent proficiency in English, he was able to approach many scientific questions from different angles. During the courses, he always made many valuable contributions to group discussions. Finally, it should not be left unmentioned that he is a very pleasant person to work with.

In my opinion, he made the right decision to pursue his specific research interests at your university, and I am confident that he will be a highly valuable addition to your Ph.D. program, where he could develop and apply his extraordinary talents. Furthermore, I am certain that he would qualify for any means of financial aid that you could offer him, and I also strongly recommend him for a position as a teaching or research assistant. Should you have any questions with regard to him, I will be pleased to answer them.

Yours Sincerely,

Dr. Nitin P. Gulhane

Professor in Mech Engg.
