

### LETTER OF RECOMMENDATION

I am pleased to endorse **Mr Parth Pandit** for the PhD degree course at your University.

I have known Parth for over three years. What impresses me the most is his well-mannered conduct and reverence for his teachers and affability with his fellow students. Besides, I find him to be an ever-willing listener and keen student, who is always trying to do his best in studies.

As far as his academics are concerned, he has the aptitude to recognise the basic principles of his subjects/topics. His research skills are impressive and his presentation, be it in writing or speaking or taking part in seminars are just as good. I have always been impressed by his commitment and sincerity towards any work he gets involved in.

Parth is able to not only initiate but also take every given task towards successful completion. He does not coin excuses and is ever-willing to resolve issues with a smile, better idea or solution. I firmly believe that if he is given the opportunity for higher studies, he will realise his as-yet-untapped talent and ability to take his academic and research potential to the next level.

Parth has first-rate analytical, application and organisational ability accompanied by the talent to learn new skills. He has been a charismatic and dedicated student all through his undergraduate studies at our institute. His ever-willing ability to help everyone makes him quite popular among students as well as the teachers. He has also been instrumental in winning laurels for himself both in sports as well as co-curricular activities and guiding fellow students to win awards for themselves and the institution.

I am very confident that **Mr Parth Pandit** will be a suitable student or candidate for the **PhD** programme at your University. I have full faith in his abilities and would strongly recommend him for admission with the best financial assistance that your institution can provide.

I wish him great success in his higher academic pursuits, career and life.

Sincerely,

**Dr Sandip Zine**  
**Asst. Prof in Pharmaceutical Chemistry**
