Three days Workshop on "16S rRNA gene amplicon analysis"

October 03-05, 2023, Kharagpur, India

Jointly organized by

Technical University of Munich, Germany

Computer Science and Engineering, Indian Institute of Technology Kharagpur, India

National Supercomputing Mission (NSM) Nodal Center, Indian Institute of Technology Kharagpur, India

Objective and Scope

This workshop will give you,

- Theoretical and most of all practical knowledge on how to high-throughput sequencing data based on 16S rRNA gene amplicon libraries.
- A better insight into the challenges in NGS data analysis and possible ways to deal with them.
- An understanding of the better representation of the results.

ParamShakti Facility at IIT Kharagpur

Who and how can apply

- IIT Kharagpur students working/planning to work on next-generation sequencing data.
- Actively working on microbiome research.
- Analyzing patient data and agricultural data.
- Performs bioinformatic analyses on NGS data.
- Basic knowledge of computer programming, especially python and R, is required.
- To apply use the following google form link.
<https://forms.gle/d0Uq11UC2AMcrgLK6>

Registration is subject to availability of the seats! The student need to carry their own laptop for the hands-on session.

Date: 27-07-2023

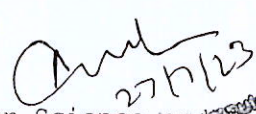

Given the current impact of the analysis of the Next generation sequencing data for microbial research and analyzing patient and agriculture data, I requested PD. Dr. Klaus Neuhaus, Head of Core Facility Microbial at the Technical University of Munich, Germany to conduct a joint workshop at our institute for the benefit of our students. He kindly agreed to send his team at IIT Kharagpur for a three days hands-on workshop (Oct 03-05, 2023). The workshop may lead to a joint collaboration between IIT Kharagpur and Technical University of Munich, Germany.

Also, on my request, Dr. Klaus Neuhaus mentioned that they will borne their own expense (international air fare) except for local hospitality so that we can make the workshop free for our students. Therefore, I am requesting to support only for their local hospitality (accommodation and food at the Technology Guest House for four days (Oct 02-05, 2023), and travel support to-and-from Kolkata airport). Since I do not have any other way to support this so I am requesting your good office to kindly consider. (A)

Our email exchange and the tentative workshop content is attached for your kind perusal. Submitted for your approval please.

Dear Pralay,

thank you very much for your request.

While I will not personally join the workshop, Aritra Mahapatra, Ilias Lagkouvardos, and Mohsen Pourjam will be traveling and conduct the workshop in India. This team needs accommodation and means for local traveling.

Since we hope to possibly collaborate in the future, we cover long-distance travel to India. Further, we will not charge any of the participants. Normally, this would be 200 Euro per participant per workshop.

While you would like to invite also undergraduate students, I imagine that graduate students might get more out of it. The workshop is about the concept of marker-gene diagnosis (or some people like to call it "taxonomy by barcoding") and entails a detailed look into pipelines, parameters and pitfalls concerning 16S analysis. Furthermore, since the workshop is with "hands on", I suggest not to have more than 40 - 50 students (already this is a lot). The team will guide everybody through the process of analyzing data in order to enable deeper understanding. However, fixing problems and answering questions during the course might get an issue if too many participate.

Aritra told me, planning is already underway and certain time frames have been set up. I put the emails of the team in CC and you may contact them directly for more fine grained issues.

All the best, Klaus Neuhaus

Betreff: Request to conduct a Three days Workshop on "16S rRNA gene amplicon analysis" at IIT Kharagpur

Dear PD. Dr. Klaus Neuhaus,

Analysis of the Next generation sequencing data has become one of the key for microbial research and analyzing patient and agriculture data. We, at the Indian Institute of Technology (IIT) Kharagpur, are actively working on this. Given the expertise of your group, may I request you to conduct a joint Three days Workshop on "16S rRNA gene amplicon analysis" at our Institute for the benefit of our graduate and undergraduate students?

If you agree on this, may I know what kind of support you need for conducting this workshop at IIT Kharagpur.

We wish to make the workshop free for our students.

I am waiting for a positive response from your side.

Thanks and regards,
Pralay
